

Certificate of Analysis

hCMV cell lysate antigen

Description: A clarified cell lysate containing a mix of CMV antigens from all stages of the replication life cycle.

Product code: CMV-CL-100

Virus: Human Cytomegalovirus, strain AD-169

Host cells: Human Foreskin Fibroblasts (HFF)

Batch number: 17120120

Protein conc.: 1.0 mg/ml

Vial size: 0.1 mg

Purity: Clarified cell lysate

Buffer: 0.5% Triton X-100 in PBS

Inactivation: Tested by passage on permissive cells for 2 weeks yielding no CPE.

Usage advice: Avoid repeated freeze/thawing.

SHIPPING: Dry ice

STORAGE: Store frozen at less than -20°C, preferably -80°C
