

Certificate of Analysis

Name: Adenovirus Type 40 Antigen

Product Code: A40P-100 / A40P-1000

Batch #:

Date of Manufacture:

Product Description: Concentrated and purified Adenovirus type 40 virions from a caesium chloride density gradient banding of an optimally-infected 293-cell lysate.

Strain/Isolate: Adenovirus type 40 (Group F)

Inactivation: Heated to 56°C for 2 hours. Confirmed inactive by growth on 293 cells for 1 week with no CPE observed.

Amount: 0.1 mg / 1.0 mg

Concentration: mg/ml

Purity: Caesium chloride banded, ultrapure

Presentation: Liquid

Buffer: PBS pH 7.4

Usage Guidelines

Short Term Storage: +4°C

Long Term Storage: -80°C

General: Store frozen at less than -20°C, recommended at -80°C.

Stability: Several freeze/thaw cycles are tolerated without loss of antigenicity.
