

Certificate of Analysis

Name: Cytomegalovirus Purified Antigen

Product Code: CMV-HP-100 / CMV-HP-500 / CMV-HP-1000

Batch #:

Date of Manufacture:

Product Description: A concentrated source of human Cytomegalovirus particles purified by sucrose gradient ultracentrifugation.

Host Cells: Human Foreskin Fibroblasts (HFF)

Strain/Isolate: AD-169

Amount: 0.1 mg / 0.5 mg / 1.0 mg

Concentration: 1.0 mg/ml (BCA assay)

Presentation: Liquid

Buffer: 0.2 % Triton X-100, 10mM Tris-HCl, 1mM EDTA and 100mM NaCl, pH 7.8

Inactivation: Purified virus particles were lysed in 0.2% Triton X-100 in STE buffer. The lysate was tested by passage on permissive cells for 2 weeks yielding no CPE.

Usage Guidelines

Short Term Storage: -80°C

Long Term Storage: -80°C

General Storage Conditions: Avoid freeze/thawing. Purified enveloped viruses can aggregate upon freeze/thawing, so homogenisation by vortexing or sonication is recommended before use.
