

Certificate of Analysis

Name: Ad-luc

Catalogue number: AD001

Genome: Ad5 with an E1 and E3 deletion. Insertion of CMV-driven Luciferase gene in E1 region.

Cells grown in: 293AD cells

ACDP classification: Category 1

Purity: Purified virus

Purification method: Double CsCl gradient purification with DNase treatment and dialysis

Batch #: 376

Buffer: PBS, 50 mM Hepes pH 7.8, 10% Glycerol

Particle count: 1.16×10^{12} particles per ml (Picogreen assay)

STORAGE: Store frozen at less than -20°C, preferably -80°C

This material is intended for research purposes only, NOT FOR HUMAN USE. Handle material as a category 2 pathogen using category 2 facilities and procedures.
