

Certificate of Analysis

Name: Ad11 wild type

Cells grown in: 293AD cells

ACDP classification: Category 2

Purity: Purified virus

Purification method: Double CsCl gradient purification with DNase treatment and dialysis

Batch #: 372

Buffer: PBS, 50 mM Hepes pH 7.8, 10% Glycerol

Particle count: 1.96×10^{12} particles per ml (Picogreen assay)

STORAGE: Store frozen at less than -20°C , preferably -80°C

This material is intended for research purposes only, NOT FOR HUMAN USE. Handle material as a category 2 pathogen using category 2 facilities and procedures.
