

Antibody Datasheet

Product Name:	Mouse anti-Dengue virus serotypes 1,2 and 3 Membrane protein
Clone number:	AC6.A8.F6.B11
Isotype:	Mouse IgG2b kappa
Product code:	MAB12182-100
Batch Number:	18060816
Immunogen:	Recombinant Dengue virus-like particles, a mixture of serotypes 1-4, from the Native Antigen Company
Amount:	100ug
Concentration:	1.9mg/ml
Buffer:	Phosphate Buffered Saline pH7.4
Preservative:	None present
Purification:	Antibody was purified by affinity chromatography on Protein G
Specificity:	This antibody is specific for the Membrane protein of Dengue virus serotypes 1,2 and 3, and does not cross-react with Membrane protein from Dengue virus serotype 4.
Applications:	Direct ELISA (VLP antigen bound to plate) Western blot (non-reducing conditions)

Antigen background: The Membrane protein is a major structural protein expressed by the Dengue Virus. Envelope protein is a glycosylated protein of approximately 18-20kD, and which forms part of the virus capsid along with Envelope protein.

With more than one-third of the world's population living in areas at risk of transmission, dengue infection is a leading cause of illness and death in the tropics and subtropics (*ref WHO for Guidelines for Diagnosis, Treatment, Prevention & Control, 2009*) As many as 100 million people are infected yearly. Dengue is caused by any one of four related viruses transmitted by mosquitoes. There are no vaccines available to prevent infection with dengue virus.

Storage: Store at +4°C for up to three months, or at -20°C for longer periods
The antibody is shipped at ambient temperature.
Avoid repeated freeze/thaw cycles.
