

Certificate of Analysis

Name: Ad-gfp

Product code: AD003-100

Batch #: 19022516

Genome: Ad5 with an E1 and E3 deletion. Insertion of CMV-driven gfp gene in E1 region.

Cells grown in: 293AD cells

ACDP classification: Category 1

Purity: Purified virus

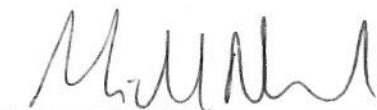

Purification method: Double CsCl gradient purification with DNase treatment and dialysis

Buffer: PBS, 50 mM Hepes pH 7.8, 7.5% Sucrose

Particle count: 1.035×10^{12} particles per ml (BCA assay)

STORAGE: Store frozen at less than -20°C, preferably -80°C

This material is intended for research purposes only, NOT FOR HUMAN USE.
