

Certificate of Analysis

Name: Toxocara canis antigen

Product code: NAT41585-100

Batch #:

Description: Soluble native somatic antigen fraction purified from Toxocara canis L3 larvae.

Strain: Toxocara canis

Health and Safety: Whole infective organisms are removed by sterile filtration. Since no procedure can guarantee absolute sterility, the reagent should be handled with appropriate safety precautions for biological materials and local biosafety procedures should be maintained at all times.

Amount: 100µg

Concentration: 9 mg/ml (batch specific)

Buffer: 0.1M Tris, pH 3.0 with protease inhibitor cocktail.

Preservatives: 0.1 % NaN₃

Presentation: Liquid.

Application: ELISA and other applications. Minimum working dilution is 1:9000 on Biomat MB Plates.

Usage guidelines: Shipped on ice packs
Storage: +2...+8°C
