

## Antibody Datasheet

**Name:** Mouse Anti Hepatitis E Virus Capsid (ORF2) Antibody (EB2)

**Product Code:** MAB12412-100 / MAB12412-500

**Clone Number:** EB2.2.G10.B4.A10

**Isotype:** IgG1 Kappa

**Batch #:**

**Amount:** 100µg / 500µg

**Concentration:** 1.0 mg/ml

**Presentation:** Liquid

**Buffer:** Phosphate Buffered Saline, pH 7.4, Filter Sterile.

**Immunogen:** HEV ORF2 aa1-660 ([REC31653](#))

**Purification:** Protein G

**Specificity:** Hepatitis E Virus Capsid (ORF2)

### Usage Guidelines

**Short Term Storage:** 1-2 weeks at +4°C

**Long Term Storage:** -20 or -80°C

**General:** Avoid repeat freeze/thaw cycles.

**Products are for Research Use or for Further Manufacturing Use only. Not for Diagnostic or Therapeutic Use.**

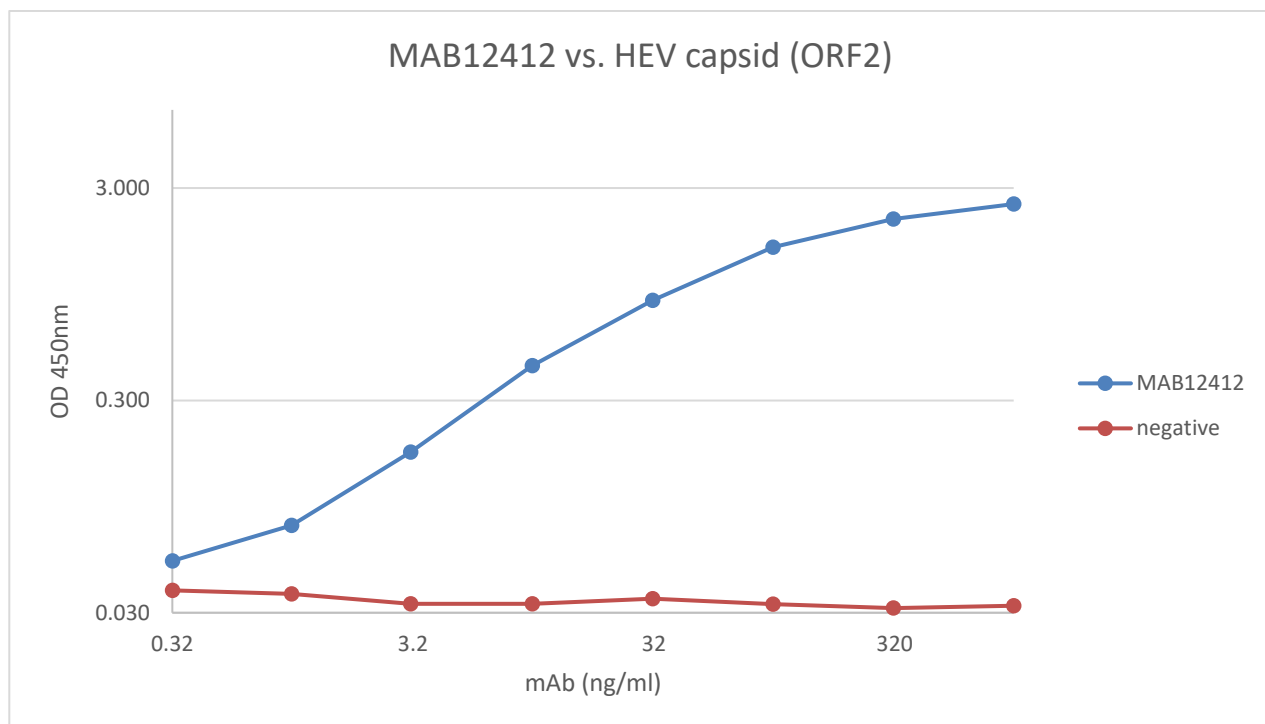

## Antibody Datasheet

**Name:** Mouse Anti Hepatitis E Virus Capsid (ORF2) Antibody (EB2)

**Product Code:** MAB12412-100 / MAB12412-500

**Clone Number:** EB2.2.G10.B4.A10

**ELISA:** Antibody titration against Hepatitis E Virus Capsid (ORF2).

Antigen coated onto microtitre plate (1µg/ml) overnight in DPBS 2-8°C. Plate washed 2 X 300µl DPBS+1% BSA (Sigma A7906) with second wash left in plate 2 hours at room temperature. Plate washed 1 X 300ul PBS + 0.1% Tween 20. Dilutions of antibody added at 100µl/well in DPBS + 1% BSA + 0.1% Tween 20, incubated shaken 3 hours at 23°C. Plate washed 3 X 300µl PBS + 0.1% Tween 20 Anti-mouse Ig-HRP (Southern Biotech 1010-05) diluted 1:10,000 in DPBS + 1% BSA + 0.1% Tween 20. Added 100µl/well, incubated shaken 1 hour at 23°C. Plate washed 6 X 300µl PBS + 0.1% Tween 20 TMB (Europa MO701A) added at 100µl, incubated static 15 min 23°C. Reaction stopped 100µl 1M HCL (200µl for wells >4.0 OD units). Plate read at 450nm and 405nm. OD values in excess of 4.0 units estimated from the OD405nm reading.
