

## Certificate of Analysis

**Name:** Campylobacter Jejuni Antigen

**Product code:** NAT41600-100 / NAT41600-500

**Batch #:**

**Date of Manufacture:**

**Description:** Campylobacter jejuni is cultured on solid medium. This antigen is a partially purified detergent extract of the membrane fraction. The main component is an outer membrane protein, approximately 45 kDa in SDS-PAGE.

**Sequence Strain:** Campylobacter jejuni subsp. Jejuni

**Health and Safety:** No specific biological hazards are known to be associated with this product. It should be handled with appropriate safety precautions for biological materials.

**Amount:** 0.1 mg / 0.5 mg

**Concentration:**

**Purity:** Major bands comparable to Reference Standard on SDS-PAGE (reducing).

**Presentation:** Liquid

**Buffer:** The antigen is presented in water.

**Other Information:** QC serum panel (multiple negative, borderline and positive sera) within defined reactivity range in ELISA (IgA, IgG and IgM).

### Usage guidelines

**Storage:** -80

**General:** Sonicate before use.

**Stability:** Not tested

**Freezing:** Avoid repeated freeze-thaw cycles.
