

Certificate of Analysis

Name: Helicobacter Pylori Antigen

Product code: NAT41603-100 / NAT41603-500

Batch #:

Date of Manufacture:

Description: Bacteria are cultured on solid medium, harvested, washed and solubilised. The antigen is partially purified by detergent extraction and centrifugation.

Sequence Strain: NCTC 11637

Health and Safety: No specific biological hazards are known to be associated with this product. It should be handled with appropriate safety precautions for biological materials.

Amount: 0.1 mg / 0.5 mg

Concentration: mg/ml

Purity: Major bands comparable to Reference Standard on SDS-PAGE (reducing).

Presentation: Liquid

Buffer: 1 % non-ionic detergent solution.

Other Information: QC serum panel (multiple negative, borderline and positive sera) within defined reactivity range in Helicobacter pylori ELISA (IgA, IgG and IgM).

Usage guidelines

Storage: -80

Stability: Not tested
