# **Antibody Datasheet**

Name: Goat Anti-Streptococcus Group A Antibody

**Product Code:** 5310-0315

Batch #:

#### **Date of Manufacture:**

**Product Description:** Affinity purified polyclonal antibody to S. pyogenes (Group A) bacteria (BacTrace®). Antibody was isolated from a serum pool of goats immunized with heat-killed whole cells of S. pyogenes. Each lot is tested to assure specificity and lot-to-lot consistency using an in-house ELISA assays.

Amount: 1.0 mg (as determined by UV absorbance at 280 nm)

**Presentation:** Lyophilized

**Rehydration:** Two methods for rehydration and storage are recommended to meet most needs, Procedure A, using 50% glycerol, is preferred. It eliminates freezing at -20 °C and is an effective biological inhibitor. At a working dilution, the level of glycerol is too small to affect most assays.

## Procedure A: 50% Glycerol

- o Solution Preparation: Mix 1 part glycerol with 1 part reagent quality water.
- Rehvdration: Transfer 1 mL of the 50% glycerol solution to the product vial. Rotate the vial until the lyophilized pellet is totally dissolved. Antibody concentration will then be 1.0 mg/mL.
- Storage: The rehydrated product is stable for a minimum of 1 year at 2-8 °C.

### Procedure B: Acetic Acid/Bi-Carbonate

- Solution Preparation: Prepare immediately before use:
  - o M Acetic Acid Solution: Mix 25 μL of Glacial Acetic Acid and 40 mL reagent quality water.
- 0.177M Carbonate-Bicarbonate Solution: Dissolve 1.09 g of Na2CO3 and 0.63 g of NaHCO3, in
  100 mL reagent quality water.
- Rehydration: Add 0.1 mL of 0.01M Acetic Acid to 1 mg of antibody. Rotate vial until totally dissolved. Add 0.1 mL of the Carbonate-Bicarbonate Solution and rapidly mix to obtain a clear or opalescent solution. Heat at 37°C for 30 minutes and allow to slowly cool to room temperature. Final concentration is 5.0 mg/mL.
- Storage: This product may be stored for up to one week at 2-8°C; thereafter, it should be stored at -20 °C. At -20 °C, product is stable fur a minimum of 1 year.

Telephone: +44(0)1865 595230

Stabilizer: No stabilizers added.

**Preservative:** No preservatives added. Non-sterile.

**Immunogen:** Heat-killed whole cells of S. pyogenes.

Purification: Affinity purified

Specificity: Tested by ELISA techniques as applicable. This product reacts specifically with

Streptococcus pyogenes (Group A).

**Cross-Reactivity:** Minimal cross-reactivity may exist to other similar species.

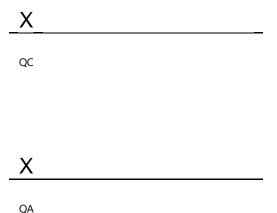

**Application Notes:** Optimal working concentrations should be determined experimentally. Prepare working dilution in PBS or other buffer. Dilution is not recommended for long-term storage. Suggested dilutions are listed below. In many cases, the antibody may be diluted further than indicated:

Capture Antibody: 10 µg/mL Primary Antibody: 1-2 µg/mL

### **Usage Guidelines**

Storage: +4°C

**Storage Guidelines:** Store +4°C until rehydrated. Stable for a minimum of 1 year when stored at +4°C. Avoid multiple freeze-thaw cycles.

Products are for Research Use or for Further Manufacturing Use only. Not for Diagnostic or Therapeutic Use.
